Self-perceived quality-of-life scale - Wikipedia
Happiness is, in part, regarded by people to be something asocial. Many regard it as immune or resistant to social factors. For instance, it is often understood to be elusive; like other emotions, such as love, it is thought to be difficult to define and describe, knowable only with the assistance of some kind of psychological knowledge.

Happy and you know it? Understanding people’s experiences ...
Happiness is primarily based on the individual self and their own personal achievements. Generally Western societies like the United States, are more individualistic and independent, focusing on a person’s thoughts, actions, and motivations. Every individual is perceived as a separate entity who flourishes within his or her own personal agenda.
